

TITLE: Research in Non-Communicable Diseases, Cervical Cancer and Breast Cancer in Haiti

FACULTY MENTOR NAME, EMAIL, PHONE NUMBER

James Grigg, MD and Vince DeGennaro, MD, MPH

james.grigg@medicine.ufl.edu

Ph: 352-265-0651

Vincent.DeGennaroJR@medicine.ufl.edu

FACULTY MENTOR DEPARTMENT

Internal Medicine

RESEARCH PROJECT DESCRIPTION

(brief overview of background, hypothesis, methods, role of medical student, funding and relevant publications—SHOULD NOT EXCEED ~ 250 WORDS)

Working with the College of Public Health and Health Professions (PHHP), the non-profit Project Medishare (Haiti), and health professionals at the State College of Medicine and Pharmacy (Haiti) we are building on our study on the epidemiology of non-communicable disease in Haiti. We are also evaluating the epidemiology of breast cancer and performing research in cervical cancer in Haiti. The role of the student depends on the project needs at time of deployment and may include data collection, implementation of protocols and data analysis. Funding for the projects are provided by a Gatorade grant, Project Medishare and the National Cancer Institute
